DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Group **1**, claims **1-10, and 14-15** are drawn to a non-volatile memory device comprising a memory cell wherein each cell further includes a plurality of sub-cells, and each sub-cell includes at least one magneto-resistive element coupled to a selection transistor;

Group **2**, claims **11-13** are drawn to a non-volatile memory device having a plurality of cells comprising a magneto-resistive element and a selection transistor, wherein a first interconnect line extending in first direction and functioning as a gate electrode of a selection transistor..., a second interconnect line extending in second direction and connect to one end of the cell, a third interconnect line extending in third direction and connected to the other end of the cell, wherein a circuit having the ends of second and third interconnect lines as its terminals in a circuit region in the periphery of memory array is connected in series with a circuit for another memory cell adjacent thereto in the first direction.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Viet Q Nguyen whose telephone number is (703) 308-4897. The examiner can normally be reached on 7am-6pm (EST).
